

La Clínica has been getting **MILLIONS** of dollars from federal and local funding to provide quality services throughout the pandemic.

We, La Clínica workers have been tirelessly working all through the pandemic to help our community & provide care for our patients.

Instead of showing up for its workers & the community, La Clínica administrators have been spending tens of millions on IT, management positions, and unknown items while denying workers decent raises and doing nothing to address the **24.9% vacancy rate** and **18.6% turnover rate** that hurts community services and causes burnout among workers.

## Management's response to their wasteful spending has been: "LA CLÍNICA HAS NO LONG-TERM FINANCIAL PLAN".

HERE'S THE NUMBERS IN MILLIONS:

Many of us cannot afford to take care of ourselves and our own families

of our coworkers at La Clínica make below the living wage for single adults in Alameda County

of our coworkers make below the living wage for families with two children in Alameda County
